**WOOL PERFECT** is a specially formulated preconditioning agent and cleaning detergent designed for the safe and effective cleaning of natural fiber and Oriental rugs and other investment textiles, area rugs, wool upholstery, and wool carpeting. While most “natural fiber and wool cleaners are just typical cleaning agents with a reduced pH, Wool Perfect was formulated from the beginning, to be effective on the most commonly encountered soils.

**Pre-Cleaning Procedures**

1. Read entire label before using. Use only as directed.
2. Carefully pre-inspect the rug, fabric, or carpet before proceeding. Identify fiber content, construction, dye stability, shrinkage considerations, and pre-existing damage. Always test every rug for dye bleeding potential. Carefully look for conditions which could contribute to cleaning related challenges such as pre-existing pet urine, water damage, fiber deterioration, past cleaning residues, and fringe discoloration.
3. The preferred method for cleaning investment textile rugs is in-plant.
4. If cleaning on-location, proper preparation of the work area must include:
   a. Make sure there is adequate airflow for drying and ventilation.
   b. Adequate and safe work area where you can safely move the required cleaning equipment and tools around and the rug can be safely cleaned on the floor without causing damage to or from other surfaces which might bleed color when moist or wet.
   c. Always keep white, cotton, colorfast towels handy to wipe up any cleaning solution overspray which may get on other surfaces.
5. Prior to wet cleaning, remove as much dry soil as possible from the rug utilizing a vacuum (with a beater bar), portable rug dusting unit, compressed air system, or automated duster. Follow equipment manufacturer directions.

**On-Location Cleaning**

1. Wool Perfect should be used as a pre-conditioner for soiled rugs, fabrics, and carpeting.
   a. For use with Pump/Electric Sprayers: Mix 4 oz. of Wool Perfect with 1 gallon hot water (1:32). For exceptionally heavy soil, mix 8 ounces of solution per gallon of water (1:16). Spray until carpet or fabric is damp. Do not allow carpet or fabric to dry before extraction.
   b. For use with Wool Compatible Brushes on Brush Pro™ and Cimex™: Mix 4 oz. of Wool Perfect with 1 gallon hot water (1:32). For exceptionally heavy soil, mix 8 ounces of solution per gallon of water (1:16). Spray until carpet is damp. Extract with your normal process. Do not allow carpet to dry before extraction.
   c. For use with Hydro-Force Sprayer: For use with regular 1-8 Hydro-Force Pro Sprayer, mix 1 part Wool Perfect to 3 parts water in five quart container. Apply evenly across carpet. Do not over-apply solution. Do not allow carpet to dry before extraction.
   d. For use with Hydro-Force Sprayer: For use with regular 1-8 Hydro-Force Pro Sprayer, mix 1 part Wool Perfect to 3 parts water in five quart container. Apply evenly across carpet. Do not over-apply solution. Do not allow carpet to dry before extraction.
2. Extract solution with appropriate rinse detergent such as Wool Zone. Mix rinse detergent according to directions.
   a. For natural fibers, use warm or cold water.
   b. For use with Wool Compatible Brushes on Brush Pro™ and Cimex™: Mix 8 oz. of solution per gallon of water (1:32). Spray until carpet or fabric is damp. Extract with your normal process. Do not allow carpet to dry before extraction.
   c. For use with Hydro-Force Sprayer: For use with regular 1-8 Hydro-Force Pro Sprayer, mix 1 part Wool Perfect to 3 parts water in five quart container. Apply evenly across carpet. Do not over-apply solution. Do not allow carpet to dry before extraction.
3. Fringe cleaning may require special solutions and cleaning application utilizing Oxybuff Cotton Shampoo.
4. Speed dry utilizing downdrat or centrifuge air movers.
5. Groom or brush as needed.

**In-Plant Cleaning**

1. WoolPerfect can be used as a preconditioner for soiled rugs, fabrics, and carpeting or as a cleaning detergent in a rug wash pit.
   a. For use with Pump/Electric Sprayers: Mix 6 oz. of WoolPerfect with 1 gallon hot water (1:16). Spray until rug is damp. Do not allow rug to dry before extraction.
   b. For use as a cleaning detergent in rug wash pit: Use solution in accordance with industry standards of care according to fiber content, construction, and dye stability. Mix 6 to 12 ounces of solution with each gallon of water depending upon soiling levels. Agitate with appropriate brushes either mechanically or by hand. For additional rug wash pit cleaning considerations, visit www.bridgepoint.com.
   c. Rinse off rug with clear water. If fiber is synthetic you can use hot water to rinse. For natural fibers, use warm or cold water.
2. Fringe cleaning may require special solutions and cleaning application utilizing Oxybuff Fringe and Fabric Cleaner.
3. If utilizing extractor, wringer, or centrifuge, follow machine instructions. Hang on rack according to instructions. Speed dry utilizing downdrafter or centrifuge air movers. Consider use of directed heat drying or dehumidification equipment based upon room temperature, humidity levels, and rug construction.
4. Groom or brush as needed.

**Available in Gallons, 4 x 1 gallon cases**

Part # CW15GL

**B R I D G E P O I N T  S Y S T E M S**

RTU pH 8.0 - 8.4
